BIO 112

Basic Anatomy & Physiology

Course Description
This course is a basic integrated study of the structure and function of the human body. Common disease processes of cells, tissues, organs and systems are stressed. Medical terminology is integrated throughout the course.

Prerequisites: ENG 100, MAT 102, RDG 100.

4.0 Cr (2.5 lect/pres, 3.0 lab, 0 other)

Course Focus
At the end of this course, students are to be able to:
1) Relate structure to function of the organ systems in the human organism
2) Understand how homeostasis is maintained in the normal organism
3) Demonstrate movements at the joints in the human body
4) Manipulate and identify major muscles in the human body
5) Explain the regulation of the homeostatic mechanisms in health and disease
6) Integrate the functions of the various organ systems to each other

Text and References
Dissection kits and gloves are available at the TCL bookstore
Rats are available to be purchased at the TCL bookstore
Optional:
BIO 112 Core Curriculum Competencies

All courses approved for the general education core curriculum help students develop communication skills and/or critical thinking.

This course develops critical thinking skills through instruction that emphasizes the understanding of the scientific disciplines of human anatomy and physiology, as demonstrated in the following:

A formal research project allowing the student to:
- apply standard scientific methods and interpret laboratory observations and data;
- make inferences justified by data and observations;
- explain relevance of findings to anatomical principles, physiological principles, or expected results;
- identify key assumptions of anatomy and physiology

Course Goals

The following list of course goals will be addressed in the course. These goals are directly related to the performance objectives. (*designates a CRUCIAL goal)

1. Practice safe lab techniques
2. Use lab equipment correctly
3. Take and record accurate lab measurements
4. Generate relevant justifiable hypotheses
5. Formulate experimental conclusions
6. Develop appropriate scientific questions
7. Design and perform an original experiment
8. Analyze scientific data
9. Relate scientific results on paper and orally
10. Explain body general organizational levels
11. Discuss living organism characteristics
12. Describe generalized homeostatic processes
13. Demonstrate anatomical position
14. Define directional terms
15. Describe body planes
16. Describe body cavities
17. Explain ion formation
18. Define electro negativity
19. Distinguish among ionic covalent peptide and hydrogen bonds
20. Draw ion salvation
21. Justify biological importance of water
22. Predict bimolecular behavior in water
23. Identify chemical reaction types
24. Discuss macromolecules
25. Recognize hydrolysis and dehydration synthesis reactions
26. Explain enzyme actions
27. Describe cell structure
28. Define organelle function
29. Explain cellular energy
30. Associate chemical/electrical gradients to potential energy
31. Relate cellular transport to cellular homeostasis
32. Explain cell cycle
33. Identify characteristics of game to genesis
34. Explain cell reproduction
35. Describe cell division
36. Explain protein synthesis
37. Differentiate tissue types
38. Describe membrane types
39. Describe skin layers
40. Describe integumentary accessory organs
41. Differentiate various bone joints
42. Describe axial skeleton
43. Describe appendicular skeleton
44. Differentiate muscle types
45. Explain muscle contraction chemistry
46. Identify body regional skeletal muscles
47. Discuss basic neural organization
48. Explain neural physiology
49. Describe nervous system divisions
50. Discuss special senses
51. Discuss endocrine anatomy
52. Discuss endocrine physiology
53. Describe blood tissue
54. Explain ABO blood groups
55. Describe heart structure
56. Describe heart physiology
57. Describe blood vessels anatomy
58. Describe blood circulation
59. Describe immune organs
60. Categorize immune system
61. Explain immune processes
62. Illustrate respiratory anatomy
63. Explain respiratory physiology
64. Describe gastrointestinal tract
65. Discuss digestive accessory organs
66. Expound nutrient metabolism
67. Describe kidney structure
68. Explain kidney functions
69. Describe urinary accessory organs function
70. Name other excretory organs
71. Discuss body fluid homeostatic role
72. Explain electrolyte balance
73. Explain acid base balance
74. Describe male reproductive organs
75. Explain male reproductive physiology
76. Describe female reproductive organs
77. Explain female reproductive physiology
78. Explain gestational processes
79. Describe common homeostatic imbalances

Student Contributions:
Classes are designed to employ a variety of teaching techniques. In order to maximize learning, required readings should be done prior to a unit. If a student is falling behind in lab performance or academic achievement, it is imperative to seek immediate assistance from the instructors.

Course Evaluation
- Student progress will be evaluated through a series of tests, quizzes in-class and out of class assignments and will be detailed in the attachment to this syllabus.
- Blackboard: lecture notes, handouts, podcasts, study hints, tutor information, syllabi, and other course information is available on the course blackboard page.
- Laboratory Component: This course has a required lab component which supplements the information presented in lecture. The lab will be independently evaluated primarily through lab practicals, in class and out of class lab assignments (such as research papers). For specific details about lab evaluations, please refer to the attachment to this syllabus.

The Values for each letter grade:

- 100 - 90   A
- 89 - 80   B
- 79 - 70   C
- 69 - 60   D
- Below 60  F

Course Schedule
The class meets for 2.5 lecture/presentation hours and 3 lab hours per week.

Developed/Revised: August 10, 2010

ADA STATEMENT
The Technical College of the Lowcountry provides access, equal opportunity and reasonable accommodation in its services, programs, activities, education and employment for individuals with disabilities. To request disability accommodation, contact the counselor for students with disabilities at (843) 525-8228 during the first ten business days of the academic term.

ACADEMIC MISCONDUCT
There is no tolerance at TCL for academic dishonesty and misconduct. The College expects all students to conduct themselves with dignity and to maintain high standards of responsible citizenship.

It is the student’s responsibility to address any questions regarding what might constitute academic misconduct to the course instructor for further clarification.

The College adheres to the Student Code for the South Carolina Technical College System. Copies of the Student Code and Grievance Procedure are provided in the TCL Student Handbook, the Division Office, and the Learning Resources Center.

ATTENDANCE
The College’s statement of policy indicates that students must attend ninety percent of total class hours or they will be in violation of the attendance policy.
• Students not physically attending class during the first ten calendar days from the start of the semester must be dropped from the class for NOT ATTENDING.

• Students taking an online/internet class must sign in and communicate with the instructor within the first ten calendar days from the start of the semester to indicate attendance in the class. Students not attending class during the first ten calendar days from the start of the semester must be dropped from the class for NOT ATTENDING.

• Reinstatement requires the signature of the division dean.

• In the event it becomes necessary for a student to withdraw from the course OR if a student stops attending class, it is the student’s responsibility to initiate and complete the necessary paperwork. Withdrawing from class may have consequences associated with financial aid and time to completion.

• When a student exceeds the allowed absences; the student is in violation of the attendance policy. The instructor MUST withdrawal the student with a grade of “W”, “WP”, or “WF” depending on the date the student exceeded the allowed absences and the student’s progress up to the last date of attendance

• Under extenuating circumstances and at the discretion of the faculty member teaching the class, allow the student to continue in the class and make-up the work. This exception must be documented at the time the allowed absences are exceeded.

• Absences are counted from the first day of class. There are no "excused" absences. All absences are counted, regardless of the reason for the absence.
  ▪ A student must take the final exam or be excused from the final exam in order to earn a non-withdrawal grade.
  ▪ A copy of TCL’s STATEMENT OF POLICY NUMBER: 3-1-307 CLASS ATTENDANCE (WITHDRAWAL) is on file in the Division Office and in the Learning Resources Center.

HAZARDOUS WEATHER
In case weather conditions are so severe that operation of the College may clearly pose a hardship on students and staff traveling to the College, notification of closing will be made through the following radio and television stations: WYKZ 98.7, WGCO 98.3, WGZO 103.1, WFXH 106.1, WWVV 106.9, WLOW 107.9, WGZR 104.9, WFXH 1130 AM, WLVH 101.1, WSOK 1230 AM, WAEV 97.3, WTOC TV, WTGS TV, WJWJ TV, and WSAV TV. Students, faculty and staff are highly encouraged to opt in to the Emergency Text Message Alert System. www.tcl.edu/textalert.asp

EXTRA:

Emergency Text Message Alert
Students, faculty and staff are highly encouraged to opt in to the Emergency Text Message Alert System. Participants receive immediate notification of emergency events and weather cancelations via text messaging on their cell phones. Participants can also opt in to receive non-emergency news and announcements. Go to www.tcl.edu. On the homepage, click on “emergency TextAlert at TCL” and fill out the form or go to www.tcl.edu/textalert.asp

GRADING METHODOLOGY
The final grade must be 70 or more (a grade “C” or better) in order to pass the course and progress to the next course. Students absent from an examination or presentation will receive a “0” grade for the examination unless other arrangements are made with the individual instructor prior to the examination or presentation day or on the examination or presentation day before the test/presentation is scheduled to be given.
The student is responsible for notifying the instructor for the reason of the absence. It is also the responsibility of the student to contact the appropriate instructor to arrange to make up the examination. Arrangements may be completed by telephone.

If the instructor is not available, a message should be left on the instructor’s voice mail AND with another member of the faculty or administrative assistant. The make-up exam will be scheduled and the instructor will decide the method of examination. Messages sent by other students are unacceptable.
