Course Focus
Philosophy is reflection on our fundamental beliefs about the world, about our values and about ourselves. Philosophers ask questions such as, “What is truth?”, “What is justice?”, “What is the meaning of life?”, “What is a person?”, “Are people free?” etc. These questions are of concern to everyone and each one of you has probably thought about one or more of them at some point in life – some of you have been prompted to do so by a powerful life experience such as the death of a loved one, others by a thoughtful book they have read or a movie they have seen, still others by a conversation with a close friend.

PHI 101 CORE CURRICULUM COMPETENCIES
All courses approved for the general education core curriculum help students develop critical thinking and/or communication skills.

This course develops critical thinking skills for students through weekly short answer essays, which require them to evaluate philosophical questions and consider how these various philosophic positions connect with their personal convictions or society’s moral standards. Students are provided with extra reading materials on the topic and are encouraged to seek out other material to support their arguments.
This course develops written communication skills through their weekly short answer essays as well as through their participation in class discussions, which enable them to further assess philosophical issues and their application to the real world.
