PURPOSE

The purpose of this procedure is to specify requirements for instruction in library and information literacy skills.

PROCEDURE

All sections of English 101, regardless of course delivery method, must receive formal instruction in library and information literacy skills from a professional librarian. Faculty should contact the LRC no less than three days in advance to schedule sessions. In the case of online courses, faculty should contact the LRC early in the semester to advise that the course is being offered in an online format. Although an online training session will be offered, it may be paired with face-to-face or other training.

For all other courses, faculty are strongly encouraged and invited to contact the LRC to schedule instructional sessions as may be appropriate to the course content.
