

QEP Student Ambassador Info Sessions

June 19 & 20

Two additional information sessions have been conducted with selected student using the TechNet conference with New River. The purpose of the sessions was to share information about the QEP and explain the role of our students in assisting with the QEP.

Their role is to assist with the marketing and communication of the QEP to fellow students, conduct small group info sessions, get the message out in classroom settings etc.

All students who attended agreed to participate in the near future. They were asked to submit their class schedule, so that any event planning can be done around their free time.

More students will be added to the “task force” along the way.
