TAKE THE FAST TRACK TO ICD-10 SUCCESS!

WHY IS ICD-10 TRAINING IMPORTANT?

Healthcare facilities and physicians’ offices must transition from the ICD-9 code set to the new ICD-10 codes on October 1, 2014. This is a monumental undertaking, especially for medical coders, because it will:

- **Significantly expand the number of codes used:** The current ICD-9 code set includes about 17,000 codes whereas the ICD-10 code set has over 155,000 codes. These new codes are more specific and more complex, requiring coders to have specialized training to effectively use them.

- **Increase the importance of biomedical sciences:** With the shift to more complex codes, an understanding of the biomedical sciences—medical terminology, anatomy, pathophysiology, and pharmacology—will be even more important for medical coders.

Medical coders who want to stay current and successful in the industry must have ICD-10 specific training—and AHIMA and AAPC recommend that coders have both biomedical sciences and code set training.

IS THE ICD-10 FastTrack COURSE RIGHT FOR ME?

The ICD-10 FastTrack course is designed for trained and experienced medical coders. The program is streamlined to teach the ICD-10 specific information needed to be successful with the new code set, and the training is:

- **All-inclusive** – The ICD-10 FastTrack course includes both ICD-10 specific biomedical sciences training as well as comprehensive code set training to ensure you can effectively use the new code set.

- **Expert-designed** – Developed in conjunction with respected industry experts Ann Zeisset, RHIT, CCS, CCS-P, and Gail Smith, MA, RHIA, CCS-P, this course is built on the expertise needed for success.

- **Employer-trusted** – Some of the largest and most respected healthcare employers in the nation (including the leading provider of healthcare services in the U.S. and one of the nation’s largest managed healthcare companies) are using this ICD-10 curriculum to train their employees! Choose training that even employers are using!

Whether you’re currently a medical coder preparing for the transition or you took a medical coding course in the past and are looking to re-enter the industry, the ICD-10 FastTrack course includes the training you’ll need to update your skills and be successful with the ICD-10 code set.

ICD-10 offers greater specificity as well as the ability to improve clinical detail about the patient encounter through more robust data. It is vital that we adequately prepare our workforce to meet these challenges, and providing students with the level of detail included in this training allows them to enter the workplace well prepared at a critical time in healthcare.

- Ann Zeisset, RHIT, CCS, CCS-P
TRAINING DESIGNED TO IMPROVE YOUR LIFE
Built on over 20 years of experience in training high-quality healthcare professionals, the ICD-10 FastTrack program helps you quickly gain the knowledge and skills you will need to be successful with the ICD-10 code set and improve your career opportunities.

PREPARE FOR THE FUTURE
The ICD-10 FastTrack course was developed by experienced industry experts to make sure it helps you develop the skills you'll need to be successful with the transition to ICD-10. This training is trusted by some of the largest healthcare institutions in the country, including the leading provider of healthcare services in the U.S. and one of the country's largest managed healthcare companies because it was developed by:

- Ann Zeisset, RHIT, CCS, CCS-P, a nationally recognized ICD-10 author and AHIMA educator
- Gail Smith, MA, RHIA, CCS-P, a respected coding and HIM educator and author
- AHIMA-Approved ICD-10-CM/PCS Trainers

LEARN AT HOME
With online training, you can minimize the challenges of taking time out to return to school. The online training format lets you:

- Study on a schedule that fits your life
- Progress at the pace that matches your learning style
- Enjoy the flexibility to adjust the time and effort you devote to your coursework each day

ACCOMPLISH YOUR GOALS WITH USEFUL EDUCATION
Our training is specifically designed to prepare you to be successful with the ICD-10 code set. In addition to employer-trusted curriculum and online flexibility, the ICD-10 FastTrack course will:

- Prepare you for the new ICD-10 content on the CCA (offered by AHIMA and to be released April 1, 2014) and CPC (offered by AAPC and to be release January 1, 2015) national certification exams
- Train you on ICD-10 specific biomedical science concepts so you can effectively use the new, more specific ICD-10 codes
- Guide you through hands-on exercises so you have real-world experience working with the new code set
