Attention: Aircraft Mechanics
Get your A&P License Now!

A&P licensed aircraft mechanics typically receive higher pay and better job opportunities. The Technical College of the Low Country is offering a 3 week course that will help prepare experienced aircraft mechanics for the written, oral and practical application exams required for the FAA’s Airframe & Powerplant License.

**When:** June 9th – June 27th, Monday – Friday, 5pm – 9pm

**Where:** TCL, New River Campus (Classroom Instruction)
100 Community College Drive, Bluffton, SC 29909
Battery Creek High School (Prac App Instruction)
Blue Dolphin Drive, Beaufort, SC

**Cost:** Tuition, books and materials:
Airframe and Powerplant - $839.00
Airframe or Powerplant - $639.00
Test Fees not included. Please read testing information section.

**Prerequisites:** You must have two original 8610-2s signed by an FAA Inspector. To obtain your 8610-2s, you must schedule and conduct an interview with an FAA Inspector through your Flight Standards District Office (FSDO). The FSDO can be reached by calling (803) 765-5931. The inspector will review your maintenance training and experience, and interview you to determine which licenses you are qualified to pursue. If you are unfamiliar with the FAA certification and testing process, you should visit their website at:

http://www.faa.gov/mechanics/become/test_requirements

**The Course:** The course includes both classroom and hands on, practical application instruction. iPads are issued to students for reference and to facilitate out of class study. Classroom sessions meet in the evenings, Monday through Thursday. Prac app sessions meet Friday evenings. Written tests should be taken Monday mornings and oral prac app tests are taken upon completion of all written exams.

Testing Information

Written Tests

- Students must schedule and pay for their written exams
- Written exams must be taken on the Monday denoted on the class schedule
- Students may take written exams at the TCL Beaufort Campus or at any other FAA approved test site (Savannah has 2 sites that may be more convenient).
- Approved test sites can be found at: http://www.faa.gov/training_testing/testing/media/test_centers.pdf
- All students are required to take the General Mechanic Written exam
- Students will only take the airframe and/or powerplant exam as denoted on their 8610-2
- Each test (General, Airframe, & Powerplant) costs $150*

Oral & Practical Exams

- Students must pass the written exams prior to taking the oral & practicals
- Oral and practical exams are administered by Designated Maintenance Examiners (DMEs)
- Students must schedule and pay for their oral and practical exams
- Names of local DME's that can administer the oral/prac application exams can be found at: http://av-info.faa.gov/DesigneeSearch.asp
- DMEs set their own prices, but typical costs for oral & practical exams:
  - $300 for General, Airframe or Powerplant*
  - $600 for General, Airframe and Powerplant*

*The cost of the course, written examinations, and oral/prac applications may be reimbursed by qualifying employer programs. Please discuss this with your managers, human resources department, or education department for more details.
