www.tcl.edu/solutions

The Technical College of the Lowcountry presents a 30 hour Small Engine Repair course to prepare for entry level employment in the engine repair field. Course topics include:

Career opportunities in the small engine repair field

Learn about career opportunities in the small engine repair industry including service technicians, service writers, service parts and business opportunities.

Safety First

Learn about safety in the workplace including personal protective equipment and working with flammable and hazardous materials.

Tools of the trade

Gain a working knowledge of hand tools and power tools used in the shop as well as shop equipment.

Engine Systems

Study all aspects of small engines including the theory of four and two cycle engines, fuel and ignition systems. Identify engine components and their function. Learn tune up and service procedures as well as general maintenance. Learn to diagnose and trouble shoot engine problems.

Practical Hands-on Training

Perform basic maintenance on engines as well as assembly and disassembly and much more in a shop environment.

30 Hours - Cost \$445.00 For information & registration:
