Core Curriculum competencies

All Courses approved for the general education core curriculum helps students develop communications skills and/or critical thinking.

This course develops effective communication skills through instruction in designing and delivering at least four presentations intended to inform or persuade listeners. This course focuses on the principles underlying effective oral presentations and the development of effective presentations in public and professional settings. We place an emphasis on analyzing audiences; composing meaningful, coherent messages; conducting responsible research; developing effective arguments; and improving delivery skills to strengthen confidence and credibility. We also place an emphasis on critical thinking skills for both speakers and listeners. It is important that you learn to develop your communication skills and that you learn how to present your findings to others. This is both a theory and a skills course, and our primary goal is for you to gain competence in public speaking and critical listening. In order to achieve our goal, we will engage in various activities, assignments, speeches, etc.

Course Goals

The following list of course goals will be addressed in the course. These goals are directly related to the performance objectives.

1. Understand the communication process and the ways that culture and diverse experiences impact the sharing of meaning.
2. Analyze the audience and situation and adapt your speech to the specific cultural and social context in which it will be delivered.
3. Conduct research and evaluate the quality of support materials and their appropriateness for use in a particular context.
4. Prepare full sentence preparation outlines that include appropriate organization, well-supported claims, reasoned arguments, and sensitivity to the rhetorical situation.
5. Perform a series of speeches using effective delivery techniques (e.g. vocal variety/articulation, gestures/body movement, and interacting with the audience), presentation aids (including PowerPoint), and ethical communication practices appropriate for use in business and educational settings.
6. Explain complex ideas to non-expert audiences and advocate for significant causes using appropriate deductive and inductive reasoning.
7. Practice effective listening in order to evaluate the public communication of others and provide constructive feedback through a series of peer evaluations and self-evaluations.

ONLINE ATTENDANCE PROCEDURE

For all online courses, students must complete an assignment designated by the instructor during the first week of classes. The instructor will drop the student from the course if the initial assignment is not completed.

Instructors will withdraw students from the class when 90% attendance is not maintained. Attendance in an online course is defined by regular course access and by timely completion of assignments as required by the instructor. Each student will be expected to access the web class at least once a week and complete 90% of assignments on time. Additional access is encouraged and may be necessary for successful completion of classes.

Failure to log in and complete assignments will result in the student being withdrawn from the course. The instructor will assign a grade of "W," "WP," or "WF" based upon the student's academic standing as the last date of attendance, which is the last login. Students are responsible for any financial matters associated with an administrative withdrawal. If a student fails to email the instructor (using the my.tcl.edu email account) requesting to be dropped from the course and has not submitted the initial assignment required during the first week of class, the instructor will assign a "Never Attended" code in the student information system (web-advisor) no later than ten calendar days after the first day of the class. Students who are dropped as a result of never attending the course are still responsible for all fees associated with the course.
